

Thi Ai Diem Nguyen

Senior Frontend Engineer · React / Next.js / TypeScript · Wrocław, Poland

(+48) 514 622 818 · aidiemnguyen2104@gmail.com · [LinkedIn](#)

ABOUT ME

Senior Frontend Engineer with 7+ years of experience architecting high-performance web applications (AI-streaming, WebRTC, SaaS). Currently pursuing a Master's in Economics & Finance at the University of Wrocław to bridge the gap between technical scalability and business value. Expert in transforming complex product briefs into robust, reusable architectures, with a proven track record of optimizing system performance and engineering efficiency in cross-functional agile teams.

EXPERIENCE

Academic Focus · Wrocław, Poland

Jan 2026 – Present

- Focused on adapting to the EU tech market, improving English and local language proficiency (Polish), and completing core master's research modules at the University of Wrocław.
- Engaged in continuous learning of advanced frontend patterns, micro-frontends architectures, and data-driven product management frameworks.

Senior Frontend Developer · Lecle Vietnam

Feb 2024 – Dec 2025 · Ho Chi Minh City, Vietnam

Invited back by Lecle to lead frontend across multiple high-stakes products during a challenging period for the company. The projects were technically demanding — an AI chat platform, a real-time video calling app, and a livestreaming feature — each requiring a high bar for performance and reliability under real load.

- **Architected** the entire frontend architecture for a WebRTC-based video product. Collaborated with Backend teams to implement dynamic stream-quality controls, reducing frontend bandwidth consumption and successfully supporting **50+ concurrent users** per session with zero lag.
- **Engineered** a production-ready AI chat interface featuring real-time response streaming, Markdown rendering, and complex conversation state management, significantly improving user retention and UI responsiveness.
- **Designed and deployed** a core shared module system (chat, payment, auth) reused across 3 distinct products, cutting time-to-market for new feature deployment by **30%** and ensuring UI/UX consistency.
- **Led and mentored** a frontend team of 6, establishing Next.js (SSR/SSG) architectural standards to optimize Core Web Vitals and SEO metrics based on specific product scaling demands.

Senior Frontend Developer · Joblogic

Oct 2022 – Mar 2023 · Remote (UK SaaS Company)

Joblogic is a **UK SaaS platform** used by field service companies to schedule engineers, manage jobs, and track assets. Real users, real workflows, a large global team — and a legacy codebase that needed modernising without disrupting anyone's workday.

- **Spearheaded** the critical migration of a legacy jQuery codebase to Vue.js for a high-traffic UK SaaS platform, improving codebase maintainability and reducing developer onboarding time.
- **Developed** a centralized design system using Storybook, aligning **50+ engineers** and product designers onto a single visual standard, which accelerated UI development cycles.

- **Refactored** a bottlenecked multi-factor data filtering system into a clean, reusable module, resolving critical runtime performance issues for global users.

Career Break — Relocation & Independent Learning · Apr 2023 – Jan 2024

Focused on improving English proficiency and self-directed learning in frontend architecture — preparing for international, EU-facing roles.

Frontend Developer · **Lecle Vietnam**

Mar 2019 – Aug 2022 · Ho Chi Minh City, Vietnam

- Built responsive UIs and **reusable modules** across multiple client projects — Korean and US-market products
- Implemented interactive features and animations that improved engagement metrics on key products

Frontend Developer · **Libero Vina Co., Ltd**

Apr 2018 – Feb 2019 · Vietnam

- Developed and customised e-commerce frontends on Magento using HTML, CSS, and JavaScript

SKILLS

Core Stack React.js · Next.js (SSR/SSG) · TypeScript · TailwindCSS · SCSS · Vue.js · JavaScript · HTML5 · CSS3

State & Data Redux · Jotai · SWR · REST APIs · GraphQL · WebSockets · JWT

Design Systems Storybook · Ant Design · Styled Components · Micro-frontends

Testing & DX Jest · React Testing Library · ESLint · Husky · Turborepo · Docker · Git · Playwright

Other Node.js · Firebase · Cursor · Figma (reading designs)

EDUCATION

Master of Economics and Finance

University of Wrocław · Oct 2025 – present · EQF Level 7

I chose this deliberately — not to pivot away from engineering, but to close the gap between technical execution and business thinking. Corporate finance, strategic planning, data-driven decision making. The kind of context that helps you build the right thing, not just build the thing right.

LANGUAGES & AVAILABILITY

Vietnamese: Native

English: Professional working proficiency

Polish: Beginner (actively learning)

Eligible to work full-time in Poland (no work permit required under student visa conditions)
